

# MARINE TUFT CARPETS

## Teak Colors, Superior Marine Quality

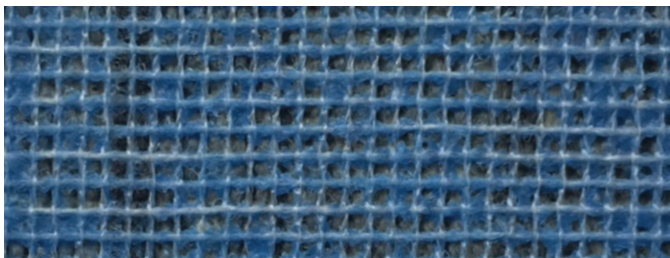

Snapincarpets.com now offers the superior quality of Marine Tuft carpets. Unlike cheaper brands, Marine Tuft is designed to withstand the harshest of nature's elements - sun, rain, wind, chlorine and salt water - while still remaining soft and comfortable underfoot.

### COLORFAST & UV RESISTANT

Marine Tuft carpet is manufactured using bulk continuous filament solution dyed polypropylene. This ensures not only a consistent supply of yarn dye lots but also the highest standard of UV resistance & color stabilisation.

### UNIQUE HYDRABAK BACKING

Only Marine Tuft carpet is backed with the unique blue acrylic latex *HydraBak*.

*HydraBak* is designed to be porous, so water drains through and away making the inbuilt mold inhibitor most effective with all Marine Tuft carpets.

*HydraBak* enables superior water evaporation and air flow for faster drying. Again helping to prevent mold.

### NO HEAVY RUBBER UNDERLAY NEEDED

The lighter weight of *HydraBak* means that the thick rubber backing used to lay most cheap carpets is not required with the Marine Tuft carpet range.

### TUFTED FOR GREATER STRENGTH AND BETTER DURABILITY

Unlike cheaper, low quality woven marine carpet, Marine Tuft is manufactured using the superior tufting technique, which also greatly reduces fish hook snags.

### CHLORINE & BLOOD RESISTANT

No matter what color you choose (see below), every Marine Tuft carpet is made from chlorine resistant yarn, which also makes it ideal for use in most wet areas with run-off, even around swimming pools. And it's resistant to fish blood which is simply hose cleaned.

### LET SNAP-IN-CARPET PROVIDE TEMPLATE CUT MARINE TUFT FOR YOUR VESSEL

As a leading computer cutting template service, snap-in-carpet can pre-cut to whatever shape you want. We may already have the template for your boat ready to go.
